**Importance:** High

Gary,

All but one item in the network was missing 3 – 4 items of LAG info on today's report. Something else changed or just about every company we deal with has changed the description on their drugs. What ever you can do to help expedite this process would be greatly appreciated. I am now reviewing the network Control Drug IRR on common sense as apposed to IRR Historical Data. I know, that is scary... be nice.

Thanks

Gary,

It looks as though the same issue we had with the Hydro items is now happening to several items. The report is about a half inch thick and only about 5 total items have historical data. The report definitely will need to be changed to active ingredient.

Team,

The issue with the Hydro items last month appears to be happening again this month with several items. This includes all drugs that end with "pam", many [REDACTED] and [REDACTED] items.

I verified the entire network this morning and there are no control drug suspicious orders.

There will be more to follow.
